

## BIODATA

Francisco José Ruiz de Mendoza Ibáñez is a professor of linguistics at the College of Humanities and Education at the University of La Rioja. With a PhD in English linguistics, Francisco Ruiz de Mendoza works on Cognitive Linguistics, Construction Grammar, inferential pragmatics, and functional approaches to language. He has coordinated funded work on figurative language from scholars across Europe, many of them part of the international *Lexicom* research group, which he co-founded. He has been invited on close to 150 occasions to present his research in universities and scientific events across the world and has published extensively on metaphor, metonymy, illocution, and grammar. He has created, with professor Ricardo Mairal, the *Lexical Constructional Model* and has authored or coauthored several books on linguistic theory, the most recent ones being *Cognitive Modeling. A Linguistic Perspective* (2014, John Benjamins), which received the 2015 AESLA Research Award for experienced researchers, and *Ten Lectures on Cognitive Modeling. Between Grammar and Language-Based Inferencing* (Distinguished Lectures in Cognitive Linguistics, vol. 25; 2020, Brill). He has edited or co-edited several books on Cognitive Linguistics and Functional Grammar.

He serves or has served on 35 editorial and scientific boards, including journals such as *Jezikoslovlje*, *Revue Romane*, and *Cognitive Linguistics*, and John Benjamins book series such as *Human Cognitive Processing*, *Metaphor in Language, Cognition, and Communication*, and *Figurative Thought and Language*.

Former editor of the *Spanish Journal of Applied Linguistics* he has been the editor of the *Review of Cognitive Linguistics*, co-editor of *Applications of Cognitive Linguistics* (Mouton de Gruyter) since their inception and co-editor of the *Bibliography of Metaphor and Metonymy* (John Benjamins, since 2012).
