PAPAYA

An ESN matching
system

ESN Westeros

How does **Papa**

(safety filter: NO spoilers
ahead) **work?**

Let's assume I'm **Jon Snow**,
leaving soon for *my Erasmus semester*,
I may need help from a Buddy...

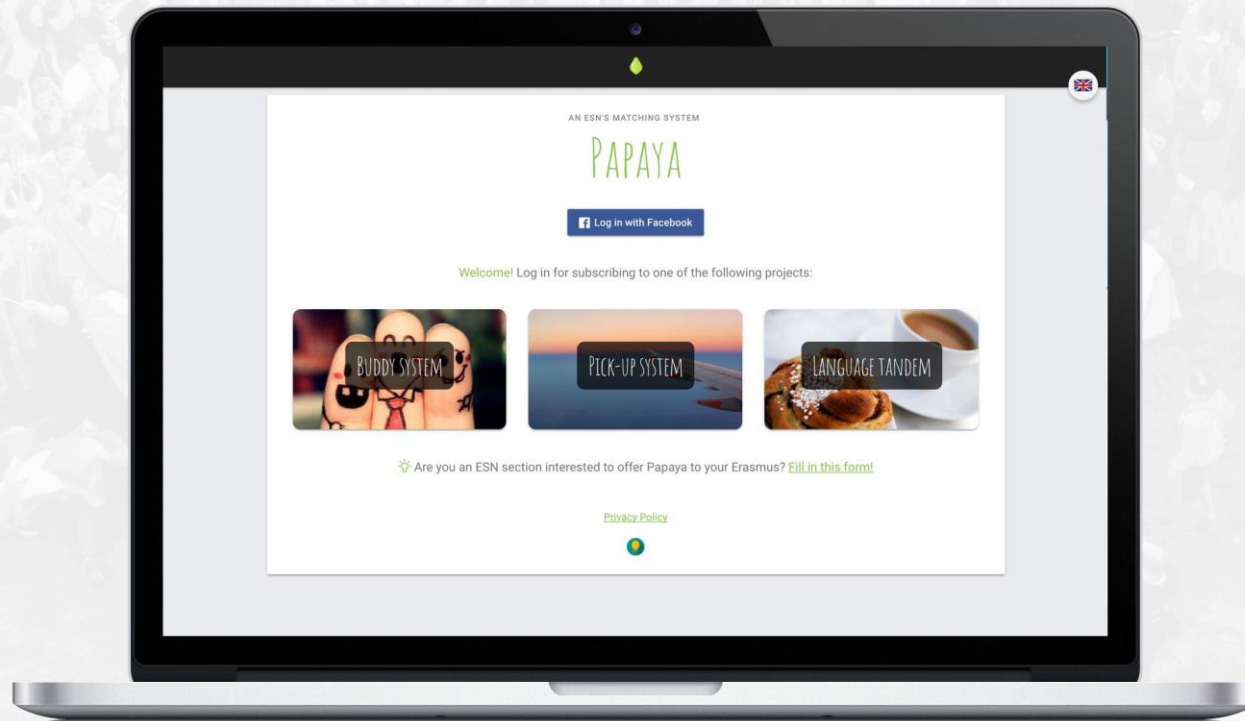

... but *I know nothing* about
Papaya

“How can I start using **Papaya** to get a **Buddy**?”

“From your *smartphone, tablet* or *PC/Mac* follow the link: <http://bit.ly/papayaESN>”

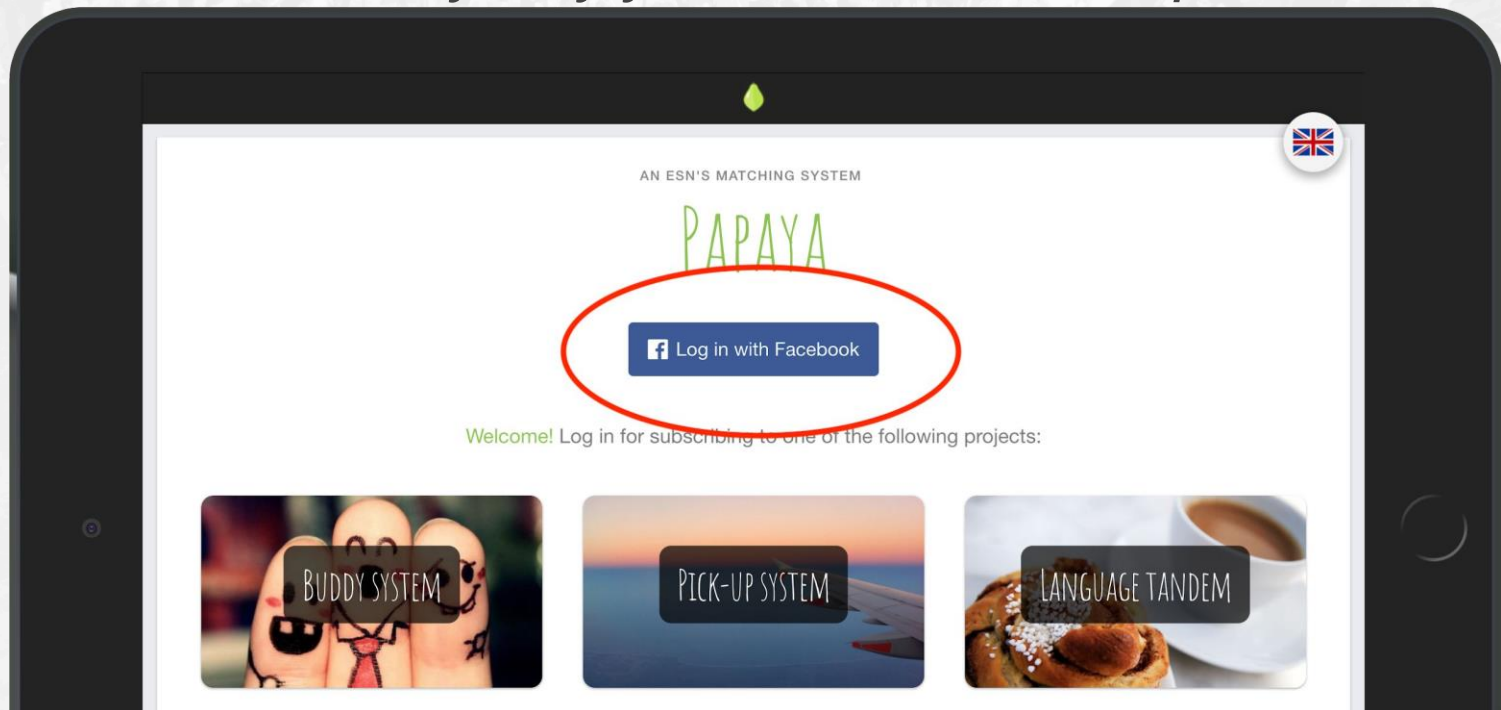

“Alright, but how can I **access Papaya?**”

“**Log in through your Facebook account** in Papaya;

that’s the only way you have to use the platform, so

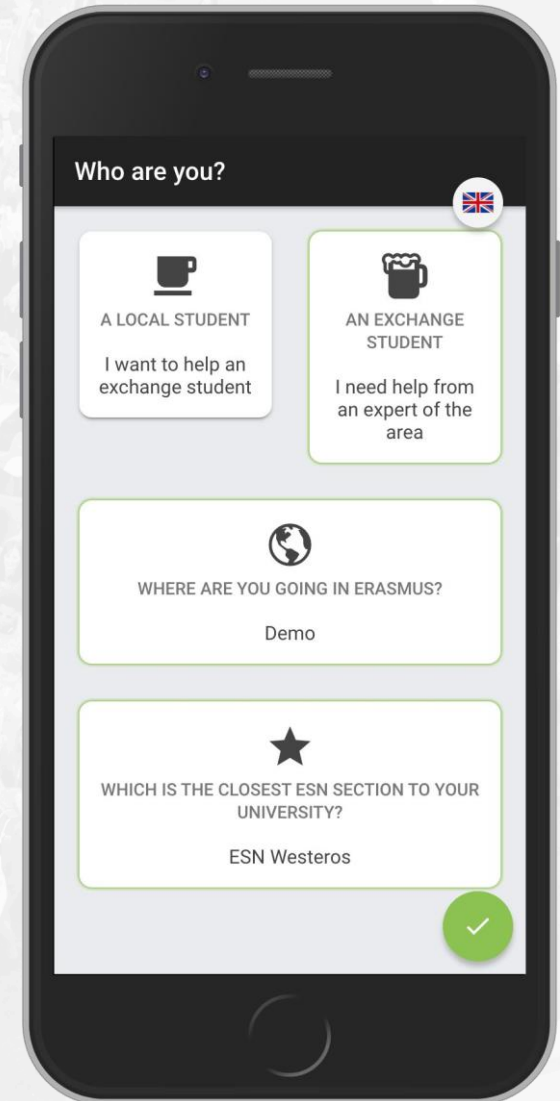

“What’s this? **Which kind of user am I?** What do I do?”

“You’re an *Exchange student*, ‘cause you’re coming from abroad and *you need help*; choose also the **country** and the **ESN section** that brought you in Papaya.”

“Cool. So that’s my profile, *huh?* Why **some data is already there** and **why do you need it?**”

“Some of the data is gathered *automatically by Facebook*, but I need you to fill in the rest: Papaya uses these attributes **to find you the perfect Buddy.**”

Architecture / Urban Planning

“Now my profile is done: **when will I have my Buddy?**”

“*It's not finished, yet.* you need to **apply** to one or more of our section's **projects**: *Buddy system, Pick-up system and Language Tandem*”

Pick-up system. When an Erasmus arrives in its new city, he/she may need a hand to reach his/her new flat (*luggages!*); local students can offer their availability to give a lift from the train/bus station or the airport.

Language tandem. Learning a new language can be hard: thanks to this project an international student and a local one can meet for a coffee, starting a mutual linguistic and cultural exchange, as well as a beautiful friendship.

“Subscribing to a new project? That sounds complicated...”

“Just **select the project** you want and add the rest of the **project-specific information** requested; afterwards, *you only need to wait for a **match**.*”

 You aren't subscribed!

The Buddy system is a project that aims to integrate and make feel at home the international students, from their earliest days in their new cities. Each Erasmus can ask to receive a local student as a tutor - the Buddy - who will be there to answer his/her questions, to clarify his/her doubts and that will help him/her take his first steps in the new city.

 Searching for a match...

“Waiting... why? When does a match happen?”

“Now it’s all up to the **projects responsible** of the **ESN section**: they will try to *pair you with the buddy that fits you the most*, based on the information you’ve typed in.”

“Hey what is this **email?** *I got a match!*”

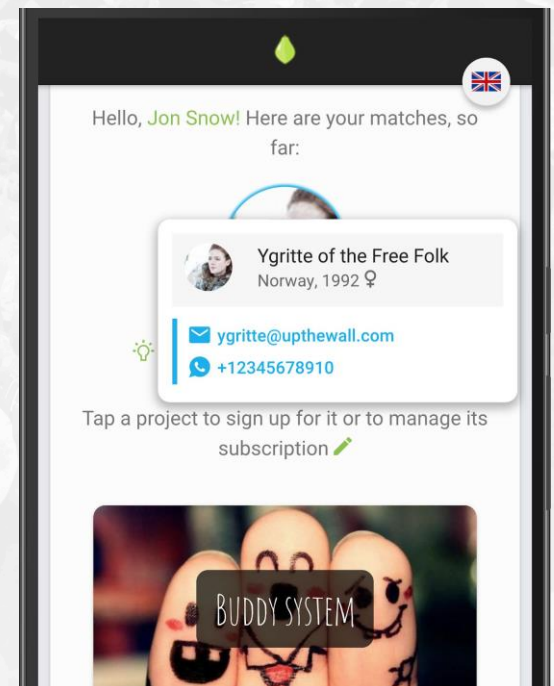

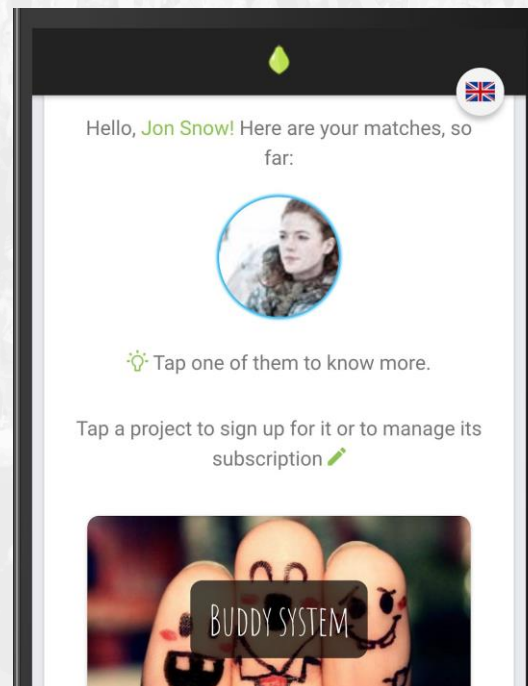

“Well done, now you can **access again Papaya** and you’ll see **the face of your new Buddy** in the main area; just *tap over him/her* to retrieve his/her **contacts!**”

Papaya Team 💡 to Jon ⇅

Hey Jon,
you've got a **match** in Papaya! 🎉

[Go and check it out ;\)](#)

Cheers,
ESN Westeros
